

# **ETL Mark & CE Markings**

## **Compliance Certifications**

# ETL Mark

## Meaning & Origin

ETL began in 1898 when Thomas Edison founded Electrical Testing Labs (ETL). Edison's vision was to provide assurance to consumers through product performance and safety testing.

## Importance to: Compliance Industry

The ETL Mark demonstrates compliance to requirements of widely accepted product safety standards, as determined by a Nationally Recognized Testing Laboratory (NRTL). Intertek is an NRTL recognized by the Occupational Safety and Health Administration (OSHA) to test products to specifications of applicable product safety standards. An NRTL's function is to provide independent testing and certification of any electrically operated product.

### *What does the ETL Mark mean when displayed on an Impact product?*

The ETL Mark indicates to distributors, retailers and customers that Impact's product has been tested by Intertek and found in compliance with accepted national standards.

### *What countries accept the ETL Mark?*

The ETL Mark is accepted throughout the U.S. and Canada.

### *Do local inspectors know the ETL Mark?*

Inspectors, code officials and authorities with jurisdiction recognize and accept the ETL Mark as proof of product compliance throughout North America and other parts of the world.

# ETL Mark

## Importance to: the Market

No other cryosauna or cryochamber manufacture or distributor has earned the ETL Mark for their entire product line.

It reflects Impact's commitment to the cryotherapy market is industry-leading and all-encompassing:

- Safety
- American quality and standards
- Made and distributed by same trustworthy entity
- Full service Customer Operations Team stands behind product and customer's business

## Importance to: Customers

For new Impact customers, their local inspectors now can rely on an independent third-party certified testing lab's ETL Mark for compliance to their local requirements, thus helping to expedite permitting and build-out.

# CE Marking

## Meaning & Origin

"CE" is the abbreviation of the French phrase "Conformité Européene" which literally means "European Conformity". The term initially used was "EC Mark" and officially replaced by "CE Marking" in 1993. **"CE Marking" is now used in all EU official documents.**

## Importance to: Compliance Industry

- Mandatory for certain products sold in the European Economic Area (EEA).
- Indicates Impact products conform with a wide array of standards for safety, health, environmental protection and quality assurance.
- Required in the EEA for electrical equipment, medical devices and most machinery.
- Found on products sold outside of EEA, making it a recognizable and valuable standard throughout the world.

## Importance to: the Market

No other U.S. cryosauna or cryochamber manufacture or distributor has earned the CE Marking.

## Importance to: Customers

It reflects Impact's **international** commitment to the cryotherapy market is industry-leading and all-encompassing:

- Safety requirement that aligns to EEA standards
- American quality and standards
- Made and distributed by same trustworthy entity
- Full-service Customer Operations Team stands behind product and customer's business
